ADDENDUM: DETAILED EMPLOYMENT HISTORY

Liquid Medical Office, Inc. **Information Systems Manager** 2010 - present

- Managed corporate internet domains, email system, website and customer support tracking system. Supported productizing tools, new customer implementation, documentation and value-added reseller (VAR) relations.

EcoGreen Group **Information Systems Director** 2009 - present

- Managed group website and internet domains. Managed group email system(s). Selected, implemented and managed group event management system.

National Semiconductor **Senior System Administrator** 1995 - 2009

- Rolled out and migrated users to a worldwide Lotus Notes/Domino infrastructure for email and rapid application development. Facilitated the retirement of an obsolete office productivity environment by migrating several key legacy functions to the new Notes environment.
- Improved stability and security of Notes and Domino system by developing maintenance procedures and performing hands-on server administration functions for headquarters infrastructure of over 30 servers.
- Implemented enterprise-wide instant messaging and online conferencing environment (internal and external) using Lotus Sametime.
- Improved uniformity of operations by providing senior level support for Notes/Domino administrators worldwide.
- Automated directory data synchronization among many platforms and systems using scripts and custom code.
- Designed and implemented a remote-site Disaster Recovery system for email and applications.
- Facilitated development of the next generation of email and collaboration systems by planning and implementing new Microsoft Office SharePoint Server 2007 infrastructure, including Production and Development farms, and by participating in rollout and migration of over 5,000 Lotus Domino mail users to Exchange/Outlook.

Alexander & Alexander Consulting Group **Operations / QA Manager** 1994 - 1995

- Implemented a Lotus Notes infrastructure and developed several Notes applications including client tracking, time tracking, and technical support databases.
- Improved and documented service bureau procedures; improved on-time performance with published work schedules, and reduced error rate through improved QA procedures.

ABB Systems Control Company **Project Manager** 1982 - 1993

- Managed several Energy Management System (software and hardware) projects ranging from under \$1 million to over \$3 million, including the management and coordination of a multi-disciplinary team of engineers and technicians over a 1- to 3-year period, using traditional project management scheduling and budgeting tools.
- Manager of Computer Operations and Documentation.
- Provided for security and system management of multiple minicomputer cluster and PC computer systems.
- Provided engineering drafting services and technical publication services for software and hardware product documentation.
- Manager of Hardware Engineering and Manufacturing operations, responsible for hardware design, equipment manufacturing, outsourcing, assembly, test, QA, service and repair for all projects and for warranty and post-warranty hardware support for customers.
- Managed facilities implementation for major motor vehicle emissions testing programs in the states of Maryland and Illinois.
